INTRODUCTION

The Historical Records Survey under the Works Progress Administration had headquarters at Knoxville, Tennessee, and the papers they produced were given to the Tennessee State Library and Archives by the Works Progress Administration ca. 1941. The materials in this finding aid measure 2.52 linear feet. Historical Records Survey contains approximate 800 items.

Literary rights to the unpublished writings in these papers are dedicated to the public. Single photocopies of unpublished writings may be made for purposes of scholarly research.

SCOPE AND CONTENT

The Works Progress Administration project for Tennessee consisted of copying tombstone inscriptions in cemeteries throughout the state. The work which was done in the late 1930s, was not completed due to suspension of the project, ca. 1939, and for this reason not all Tennessee cemeteries were covered. These are the manuscript copies which it was contemplated would be eventually typed; some of them were indeed typed, but others are simply handwritten.

The majority of counties covered are those of Middle Tennessee; several for East Tennessee; and a few for West Tennessee. An alphabetical listing of the cemeteries by county is included in these papers. In addition to the cemetery name, a brief statement of its geographical location has been included whenever possible. In some cases more detailed information on locations may be found in the papers.

Many of these cemeteries have been destroyed or damaged by weather, vandalism, and lack of maintenance since they were copied in the 1930s. In some cases these lists are the only surviving records of the inscriptions.
