## **SCOPE AND CONTENT**

The State Board of Education is the governing and policy making body for the state system of public education. The board is composed of the Governor, the Commissioner of Education, the Executive Director of the Tennessee Higher Education and twelve other members appointed by the Governor.

The Board of Education is directly responsible for the governance of the state-operated special schools and the state educational television systems and prescribes the specific rules and regulations and standards for the operation and approval of the public schools.

Record Group 91 deals with the State Board of Education in its various forms from 1815-1958.

Records in this collection include correspondence, minutes, reports, audits, investigations, school records, supporting papers, indices to minutes, deed relinquishments and circulars.

Of special interest are a large collection of photographs. These photographs are of school buildings during the period 1921-1938 when many one room schools were being consolidated.

Other items of interest include volumes of teacher exams, minutes, circulars, teacher certificate renewals, examination papers, vouchers, curriculum guides, faculty reports and expense and account books.
